

Information Concerning ITEM 2010

The International Technical Exhibition of Medical Imaging 2010 will be held from April 9 (Friday) to April 11 (Sunday) at Pacifico Yokohama Exhibition Hall, in Halls B, C, and D.

This comprehensive academic exhibition, managed by the Japan Industries Association of Radiological Systems (JIRA), has been held in conjunction with the Annual Meeting of the Japan Radiological Society (JRS), the Annual Scientific Congress of the Japanese Society of Radiological Technology (JSRT), and the Scientific Congress of the Japan Society of Medical Physics (JSMP) since 1988.

The exhibition brings together all the latest medical imaging systems and peripheral devices. It is hoped that a large number of people from a wide range of fields will attend.

Notes Regarding Admission

People who have registered for admission to the 69th Annual Meeting of the Japan Radiological Society (JRS), the 66th Annual Scientific Congress of the Japanese Society of Radiological Technology (JSRT), or the 99th Scientific Congress of the Japan Society of Medical Physics (JSMP) are not required to register for admission to the exhibition. However, at the exhibition entrance, it is necessary to scan the barcode on the name card (congress registration card) received at the time of registration (in order to track exhibition attendance figures).

People who have not registered for admission to any of the above congresses and staff members of companies in related businesses should show their completed registration/admission cards for the exhibition (and, optionally, business cards) at the front desk and wear their cards when entering the exhibition area.

Attendees without a registration/admission card must pay an admission fee of ¥3000 (¥1000 for medical students and medical technology students) at the front desk to receive an admission card. Upon receipt of the card, they must fill it in and complete the registration procedures at the front desk as described above.
