

Invited Lectures

- Invited Lecture 1: April 9(Fri.) 16:00~16:50, Main Hall
Moderator: Kazuhiro Katada (Fujita Health University)
“Radiology: Publication Policies”
Herbert Y. Kressel (Editor, Radiology and RSNA Science Editor)
- Invited Lecture 2: April 10(Sat.) 16:00~16:50, Main Hall
Moderator: Yasuyuki Yamashita (Kumamoto University)
“How to Publish in Radiology”
Herbert Y. Kressel (Editor, Radiology and RSNA Science Editor)

Special Lectures

- Special Lecture 1: April 8(Thu.) 16:10~17:00, Room302
Moderator: Masao Sako (Kobe University)
“Fenestrated and Branched EVAR - State of the Art”
Krassi Ivancev, Seamus Harrison (University College London Hospitals)
- Special Lecture 2: April 9(Fri.) 9:10~10:00, Room302
Moderator : Sadayuki Murayama (Ryukyu University)
“Radiological Phenotyping of COPD”
Hans-Ulrich Kauczor (University of Heidelberg)
- Special Lecture 3: April 9(Fri.) 9:10~10:00, Room303
Moderator : Hiroshi Honda (Kyushu University)
“MR imaging at high magnetic fields: A challenge to new biological information”
Masaya Takahashi (The University of Texas Southwestern Medical Center)
- Special Lecture 4: April 9(Fri.)9:10~10:00(304)
Moderator : Yukio Miyamoto
(The Jikei University School of Medicine)
“NON-VASCULAR INTERVENTION IN THE URINARY TRACT”
David Rickards (College London Hospital)
- Special Lecture 5: April 9(Fri.)14:00~15:00, National Convention Hall
Moderator :Masato Hareyama
(Sapporo Medical University)
 1. Current status and prospects of clinical application of the new radiosensitization treatment (KORTUC)
Yasuhiro Ogawa (Kochi University)
 2. Cancer is cured so much by radiotherapy.
Takashi Yamashita (The Cancer Institute Hospital of JFCR)
- Special Lecture 6: April 10(Sat.)9:10~10:00, National Convention Hall
Moderator : Shogo Yamada (Tohoku University)
“Optimal treatment for superior sulcus tumors (SST): Surgery first followed by adjunct RT/ChT improved survival for patients with resectable SST”
Ritsuko Komaki (MD Anderson Cancer Center)
- Special Lecture 7: April 10(Sat.)9:10~10:00, Main Hall

Moderator : Yukio Miki (Osaka City University)
“Cerebral Small Vessel Disease”
Mark A. van Buchem (Leiden University Medical Center)

- Special Lecvture 8: April 10(Sat.) 9:10~10:00, Room302
Moderator :Yoshifumi Narumi (Osaka Medical College)
“MR Imaging of Cervical Cancer: Primary Staging and Detection of Cancer Recurrence”
Bernd Hamm (Charit’e University)
- Special Lecture 9: April 10(Sat.)9:10~10:00, Room304
Moderator :Kunihiko Fukuda
(The Jikei University School of Medicine)
“Imaging and Classification of Thoracolumbar Injury”
Heung Sik Kang (Seoul National University)
- Special Lecture 10: April 10(Sat.) 13:10~14:00, Room303
Moderator : Hironobu Nakamura
(Saito Yukoukai Hospital)
“The Role of Technology in the Future of Interventional Medicine”
Michael D. Dake (Stanford University)
- Special Lecture 11: April 10(Sat.)13:10~14:00 (Annex Hall F205 + 206)
Moderator : Hiroshi Ikeda (Sakai Municipal Hospital)
“Clinical research in head and neck oncology, 15 years experience of the GORTEC”
Jean Bourhis (Institute Gustave Roussy)
- Special Lecture 12: April 10(Sat.)15:10~16:00, Main Hall
Moderator : Tsutomu Araki (Yamanashi University)
“Molecular imaging contrast agents; the current status and future prospects”
Hisataka Kobayashi (NIH)
- Special Lecture 13: April 11(Sun) 9:10~10:00, National Convention Hall
Moderator : Manabu Minami (Tsukuba University)
- The image findings of serious cases of influenza A (HINI) virus infection.
Tamio Kushihashi, Ryutaro Ukisu, Hidefumi Fujisawa
(Showa University Northern Yokohama Hospital)
Yoh Umeda
(Children’s Medical Center, Showa University Northern Yokohama Hospital)
- Special Lecture 14: April 11(Sun.) 13:10~14:00, Room301
Moderator :Hajime Kitagaki (Shimane University)
“Diffusion-weighted imaging (DWI) outside the brain: Key knowledge accumulated so far and things to be solved in future”
Taro Takahara (University Medical Center Utrecht)

International Sessions

- International Session 1: April 9(Fri.) 9:10~11:45, National Convention Hall

“Current Status and Future Direction of Interventional Radiology”

Moderator : Kenji Nakamura (Osaka City University),
Tsuneo Ishiguchi (Aichi Medical University)

1. CT Guided Radiofrequency Ablation for Liver, Lung, Kidney, and Bone Diseases
Susumu Kanazawa (Okayama University)
2. The Evolution of TEVAR Technology for the Treatment of Thoracic Aortic Diseases
Michael D. Dake (Stanford University)
3. How to Create a Multi-Disciplinary Team for Endovascular Procedures
Krassi Ivancev (University College London Hospitals)
4. Portal Hypertention
Shozo Hirota (Hyogo College of Medicine)
5. Interventional Radiology in China: Current Status and Future
Gao-Jun Teng (Zhongda Hospital, Southeast University)

▪International Session 2: April 10(Sat.) 10:00~11:45, Main Hall

“Current Status and Future Direction of Neuro MRI”

Moderator : Yukio Miki (Osaka City University)
Shinji Naganawa (Nagoya University)

1. Current Status and Future Direction of Neuro MRI
Mark A. van Buchem (Leiden University Medical Center)
2. Current Status and Future Direction of Diffusion MRI
Kei Yamada (Kyoto Prefectural University of Medicine)
3. Current Status and Future Direction of Perfusion MRI
Makoto Sasaki (Iwate Medical University)
4. Functional Magnetic Resonance Imaging of the Brain
Kook Jin Ahn (The Catholic University of Korea)

▪International Session 3: April 10(Sat.)13:10~15:10, Main Hall

“Current Status and Future Direction of Diagnostic Radiology”

Moderator : Kengo Yoshimitsu (Fukuoka University)
Kiyoshi Murata
(Shiga University of Medical Science)

1. MRI of the Lung
Hans-Ulrich Kauczor (University of Heidelberg)
2. Current Status and Future Direction of Cardiac Radiology
Hajime Sakuma (Mie University)
3. Future of Radiology is Here: Abdominal Imaging
Jeong Min Lee (Seoul National University)

4. Current Status and Future Direction of Pelvic Radiology

Satoru Takahashi(Kobe University)

5. Musculoskeletal MRI: Achievements and Challenges

Heung Sik Kang(Seoul National University)

▪International Session 4: April 10(Sat.) 14:00~16:30, Annex Hall F205 + 206

“Current Status and Future Direction of Radiation Oncology”

Moderator : Hiroki Shirato (Hokkaido University)

Keiichi Nakagawa (Tokyo University)

1. Pros and Cons of Intensity Modulated Radiation Therapy (IMRT) with Concurrent Chemotherapy for Patients with Inoperable Stage III Non-Small Cell Lung Cancer

Ritsuko Komaki (MD Anderson Cancer Center)

2. Current Status and Future Direction of Esophageal Cancer

Kenji Nemoto (Yamagata University)

3. Current Status and Future Direction of Prostate Cancer

Takashi Mizowaki (Kyoto University)

4. Current Status and Future Direction of Radiation Oncology in Head and Neck Cancer

Jean Bourhis (Institute Gustave Roussy)

5. Diffusion-weighted MR Imaging of Gastric Cancer: A Preliminary Study

Xiao-Peng Zhang

(Peking University School of Oncology / Beijing Cancer Hospital)

Honorary Awarding Lecture

▪Honorary Awarding Lecture: April 11 (Sun)10:15~11:45, Main Room

Moderator :Kazuro Sugimura (Kobe University)

Kuni Ohtomo (Tokyo University)

1. Oncologic Imaging: Advances and Challenges

Hedvig Hricak (Memorial Sloan-Kettering Cancer Center)

2. Atherosclerosis: the Vessel Wall in the Spotlight

Bernd Hamm (Charit'e University)

3. Imaging for Hepatocellular Carcinoma: Recent Advances

Byung Ihn Choi (Seoul National University)
